

How to: Use The BCBSKS “Find a Doctor” Tool

The Blue Cross/Blue Shield Find a Doctor tool is a great resource if you’re looking for a new primary care physician but don’t know where to start. Here’s how to access it:

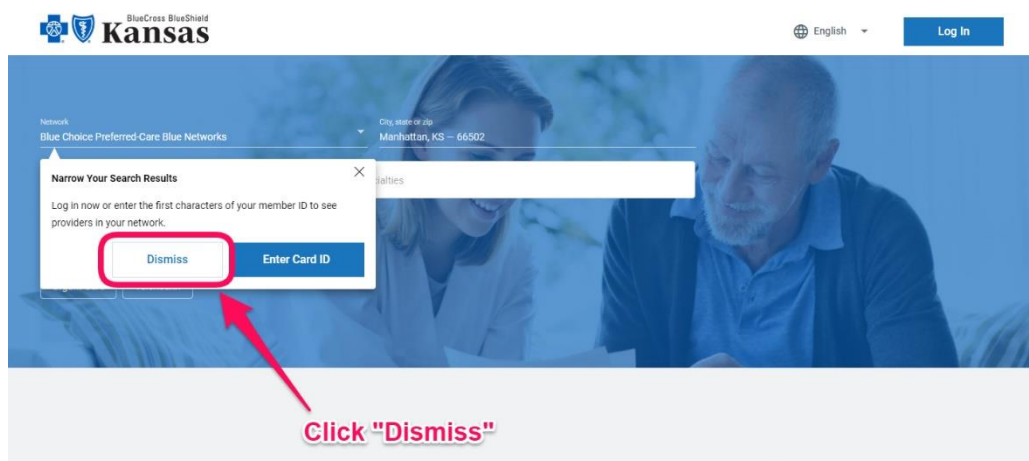

Step 1

Go to www.bcbsks.com/find-a-doctor/ and click the “Find A Doctor/Hospital” button.

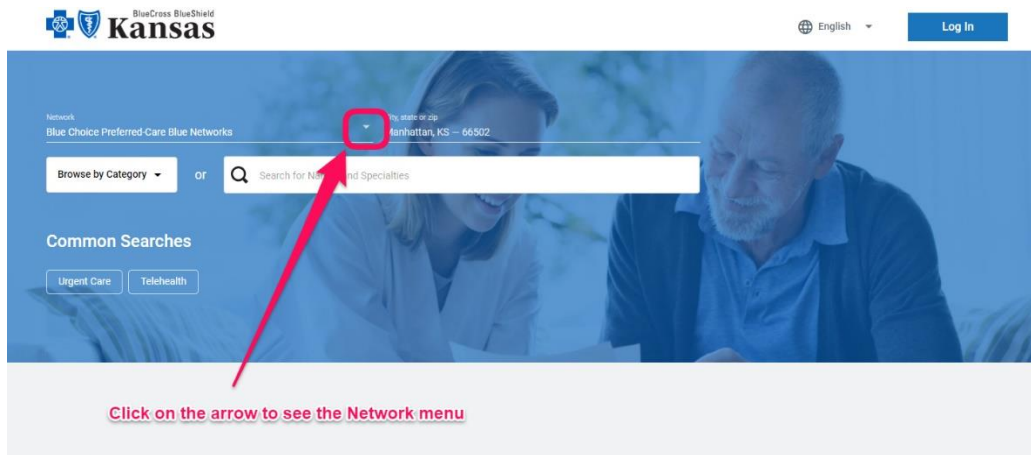

Step 2

Click “Dismiss” when asked to Enter Card ID

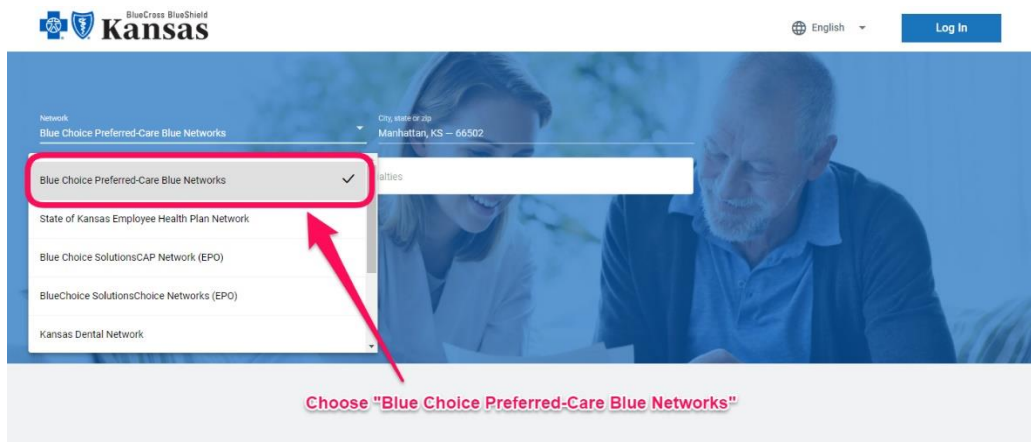

Step 3

Use the drop down arrow to see the Network options.

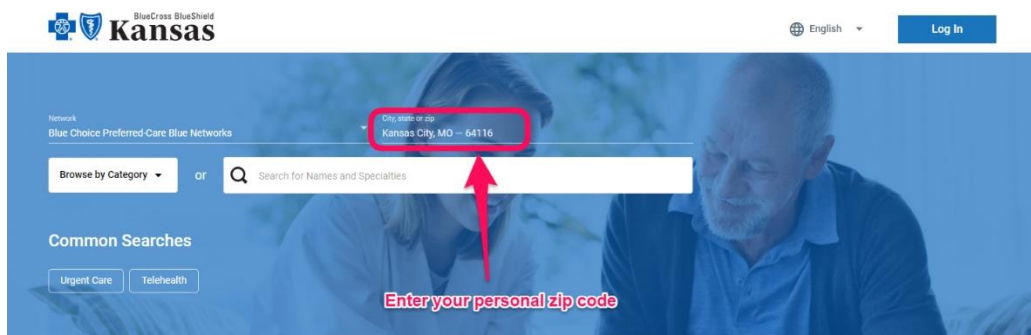

Step 4

Select "Blue Choice Preferred-Care Blue Networks."

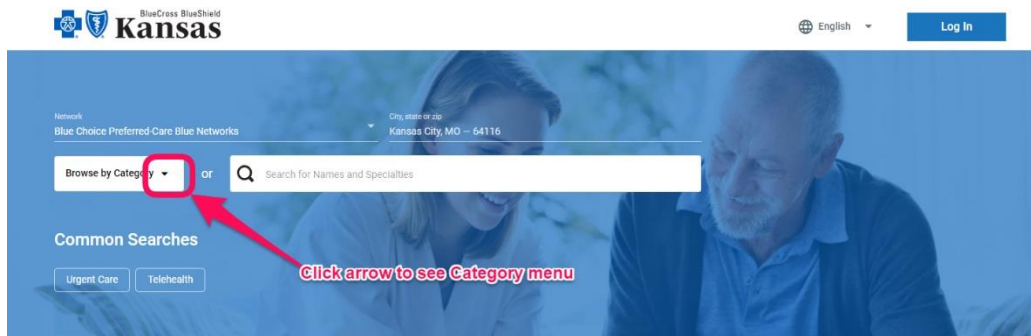

Step 5

Click in the location box and type in your personal zip code where you live.

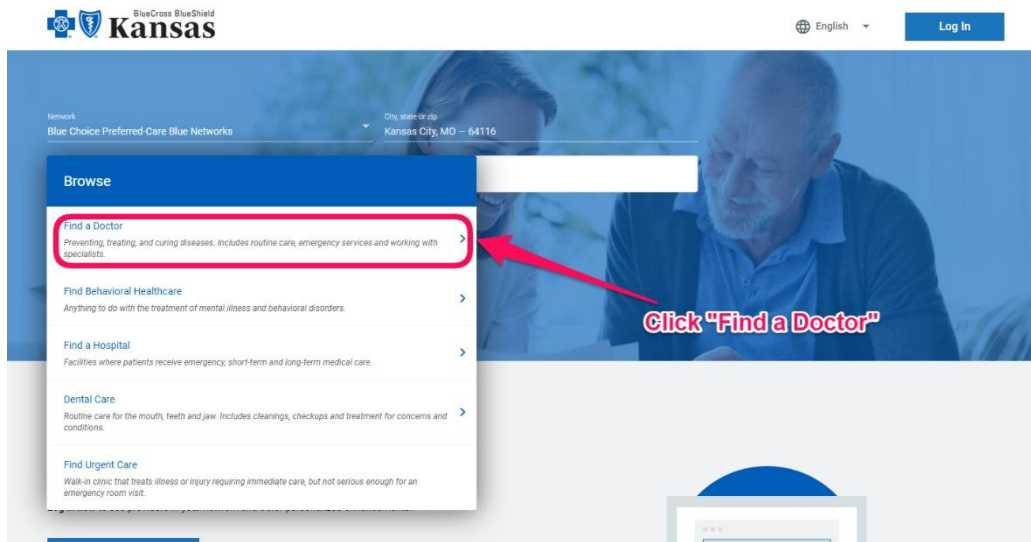

Step 6

Click the drop down arrow to browse categories of care.

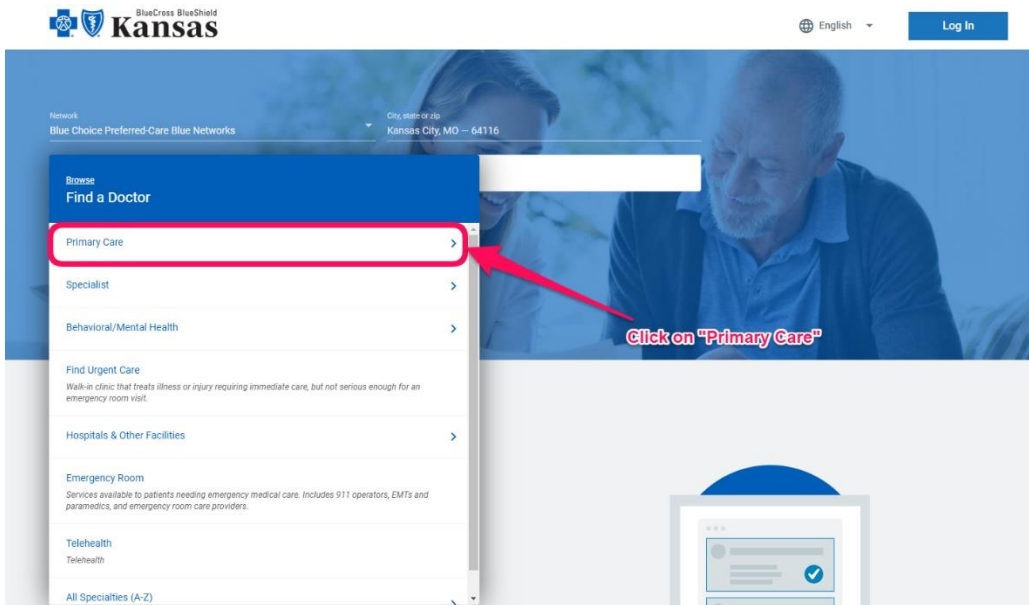

Step 7

Select "Find a Doctor" from the menu.

Step 8

Select "Primary Care."

Step 9

Choose which type of doctor you're looking for. A good rule of thumb is that if you're looking for a doctor your family can see, choose "Family Medicine." Or, if you're simply looking for a doctor for yourself, choose "General Practice."

Step 10

Click the box next to "Accepting New Patients" and select the distance you're willing to drive to the doctor's office from your home.
